

S&P Global Platts Analytics

S&P Global Platts Analytics

Connecting the space between price and value.

When uncertainty is perhaps the greatest commercial challenge of our time, how do you remove enough doubt to make a decision? We can help, not only through our ongoing assessments of transactional price but also our analysis of trade flows and future supply, demand and value.

S&P Global Platts is here to support you every step of the way, whatever your commodity or region of interest. In fact, through expanding our team and making key business acquisitions in analysis and analytical tools, we're unrivaled in our coverage of this vast, interconnected space between price and value in the energy and commodity markets.

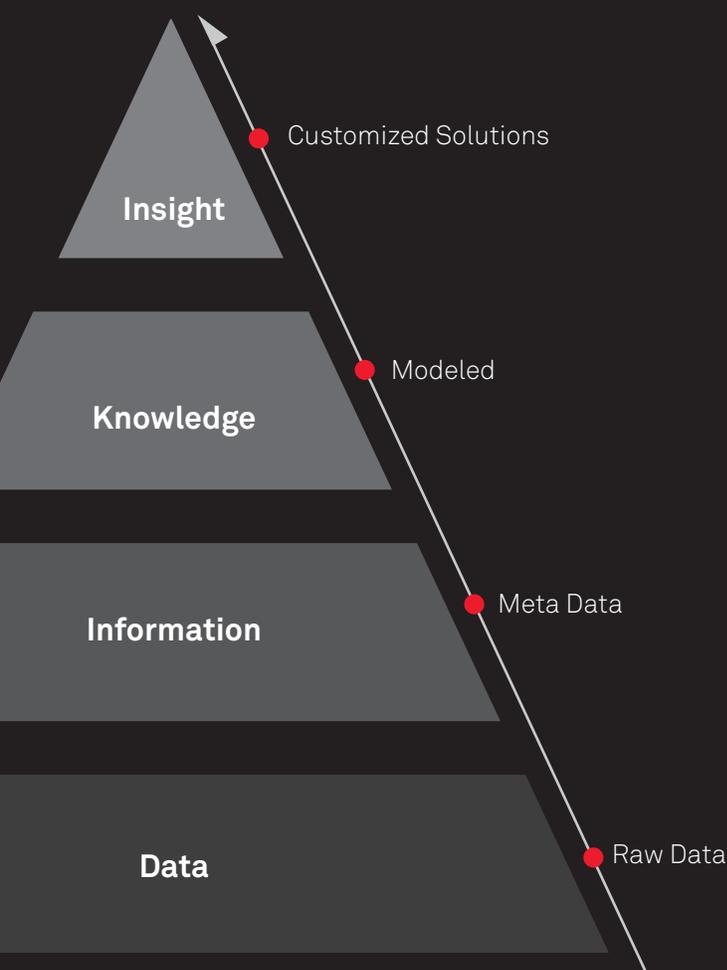

You won't find this breadth and depth of actionable information on commodity market activity anywhere else. Across the globe, the industry's most experienced, market-centric analysts are unwavering in their focus, from information gathering and producing unique

proprietary data sets, to modelling and developing forecasts. By simply absorbing their insights and examining their data, you get a vital perspective. Engage them directly and you'll find passionate, original thinkers who want to help you gain a competitive advantage that is totally specific to your conversation.

Through our capabilities in analysis and analytical tools as well as fundamentals, news and benchmarks, you can lift the burden of knowing by developing a uniquely and truly integrated point of view. Our granular supply chain and macro demand insight will help you build strategies and make decisions with greater conviction.

And ultimately, with S&P Global Platts and our analysts, you will gain the wider context required for a confident view on what drives prices, now and in the future.

Our Approach

It is this foundation in data that allows S&P Global Platts' team of experienced professionals to provide true transparency and ongoing market analysis to every client.

Data Driven Analysis

Our analysis is built using the most granular level of data available. This allows us to develop insights based on market fundamentals, utilizing proprietary data collection technology, relational and non-relational databases and modelling tools.

Transparent Methodology

Our methodologies bring consistency and robustness to our analytics through principles and parameters that are completely transparent to our customers at every stage of the process. As our analysts use multiple data inputs to develop a full understanding of commodity markets.

Ongoing Market Analysis

Our evaluation of commodity markets provides ongoing identification of material developments and analysis through a range of reports and services. Our subscription reports and online analytics tools can track commodity market developments on a daily, weekly, or periodic basis.

Access to a Global Team of Commodity Analysts

The essential insights from our analytics are based on a bottom-up approach to data analysis. We begin with raw data, then aggregate and align it to create context and isolate trends. Our analysts then model and analyze that information in order to create customized solutions tailored to your specific needs.

BETTER TOGETHER

Leading energy and commodities market analytics under one roof

S&P Global Platts is the leading independent provider of information and benchmark prices for the energy and commodities markets. Customers in over 190 countries look to us for insights, pricing and analytics to deliver essential intelligence needed for better business decisions.

WORK WITH US AND LEARN WHY WE'RE BETTER TOGETHER

Comprehensive Data Across Key Commodities

Our proprietary data and analytics tools cover short- to long-term outlooks, across all major commodities and geographies.

Deep Experience, Expertise and Coverage

Our objective and transparent methodology leverages the experience of our renowned analysts into comprehensive models, research, and training.

Integrated Coverage and Analytical Capabilities

Our analysis integrates a rich set of fundamental data and deeper commodity coverage with expert judgement to help you make the best decisions possible.

Global Perspective with Granular Regional Views

We provide a holistic view of global commodity and energy markets, based on granular supply and demand insights at a local and regional level.

Crude Oil

Huge increases in crude oil production in North America have shaken up the global markets. Decisions about where, how and when to act are dynamic and need the best information to guide you to the best results. S&P Global Platts helps you make these important decisions by providing information on the upstream, midstream and downstream sectors of the global crude oil market. Platts examines every aspect of the global oil market, including demand, inventories, refining, infrastructure and trade flows, helping to improve market transparency and your understanding of emerging trends.

What we offer

S&P Global Platts provides clients with in-depth and independent analyses of worldwide crude and petroleum products markets, including fundamentals data, price forecasting, and insights into market developments and emerging trends. Whether you are selling, buying or trading crude or products, our global oil coverage provides commercially oriented analysis of supply/demand fundamentals and price movements — actual and forecast — across the globe.

- React faster with real-time data and timely analysis compiled by our local and global analysts
- See a detailed and integrated view of supply and demand fundamentals
- Gain insights into market changes in crude oil and refined products along the value chain

Solution

01 PIRA Global Oil Analytics Service

The PIRA Global Oil Analytics Service provides comprehensive and detailed coverage of the global oil markets with the objective of helping our clients understand which way the market is headed. Our views are fully integrated with the NGL and global gas markets. Key intelligence is delivered through analytical reports and exhaustive databases, providing clients with timely, independent insight on the global crude, refining and oil product markets.

02 PIRA Oil Producer Marketing Service

Understand valuations for any existing or newly developed crude oil stream via a fully customizable solution, designed for crude producers, marketers and traders.

03 PIRA World Refinery Database

Benefit from an in-depth, forward-looking view of refinery capacity - by unit, configuration, major process units, detailed ownership history and projected capacity - covering nearly every refinery in the world.

04 PIRA World Oil Supply Data Portal

Gain online access to S&P Global Platts historical and forecast global oil supply data, covering both short-term and long-term forecast periods.

05 Platts cFlow

Understand the dynamics of worldwide freight markets via extensive reports and map views on any region, cargo or type of vessel.

06 PIRA Oil Products Trading Analyzer Portal

Analyze oil product trading, including arbitrages between markets, market fundamentals and prices, inventory days cover forecasting, and charting functionality for cracks and time spreads. Examine specific contracts performance from a historical perspective.

07 PIRA Oil Trade Flow Portal

Gain a detailed and interactive view of regional balances and trade flows for crude and major refined products. See refinery production/yields, crude production/runs, product demand, net inter-regional trade flows, and inventory changes.

08 Platts Oil Volatility Analytics

Acquire detailed, statistical-based reports providing you with the essential and insightful market intelligence for trading and hedging decisions.

09 PIRA Freight Market Outlook

Understand the key assumptions and oil flows in S&P Global Platts monthly World Oil Market Forecast to analyze tanker demand and develop detailed transportation balances for the major vessel groups.

10 PIRA World Energy Demand Model

Project annual energy demand and test your customized models across 10 non-oil fuels and 19 oil products for 143 countries based on country specific GDP and population growth, oil prices, fuel substitution, technological change and efficiency gains.

11 Platts Production Monitors

Gain intelligence on natural gas pipeline flows, gas and oil infrastructure, well level data, producer behavior and rig activity for an integrated and comprehensive view of North American oil and gas production. Platts Production Monitors cover:

- **Canada:** Covers British Columbia, Alberta, Bitumen, Saskatchewan, Manitoba, Eastern Provinces, and the Northern Territories.
- **Midcontinent:** Covers Anadarko, Williston, Ardmore, Fayetteville, Arkoma-Woodford, Palo Duro, Ohio, Michigan, and PADD 2.
- **Northeast:** Covers Marcellus – wet and dry, Utica – wet and dry, New York, Kentucky, Virginia, and PADD 1.
- **Southeast:** Covers Permian, Eagle Ford, Ft. Worth, Offshore, LA Gulf Coast, Haynesville, Fayetteville, East Texas, Arkoma-Woodford, Palo Duro, San Juan, and PADD 3.
- **West:** Covers Williston, Denver-Julesburg, Powder River, Uinta, Green River, Piceance, Paradox, San Juan, Raton, California, Alaska, and PADDs 4 and 5.

12 Platts Welscape 4.0

This web-based platform provides integrated and continuous access to permits, rig locations, completions, production, and rig specification data.

Petrochemicals & Natural Gas Liquids

The petrochemical and NGL industries continue to be impacted by the globalization and integration of the world economy, thanks to shifting supply sources and consumer demands, feedstock competition, and technological advancements. Whether you're a petrochemical company, manufacturer, upstream or downstream oil and gas company, a freight and logistics group or an infrastructure company, it's vital to understand where business risks and opportunities lie in this highly dynamic and growing market.

What we offer

S&P Global Platts is your point of reference for global petrochemical and NGL markets. Whether your focus is petrochemical feedstocks, olefins, aromatics, polymers or solvents; we provide the critical market data, price assessments and industry news and analysis to meet your business needs.

- An integrated view of supply and demand fundamentals driving global NGL markets
- Insights into changes in global Petrochemical and NGL production, trade and consumption
- Current market developments and industry backdrop for evaluating commodity and equity investments

Solution

01 PIRA Global NGL Analytics Service

Get online access to a comprehensive set of supply/demand and pricing fundamentals data, analysis and projections; and understand how trading patterns, government regulations are evolving and prices of NGLs will change.

02 Platts NGL Facilities Databank

Gain insights – covering infrastructure data, fractionation and capacity - into more than 1,120 existing natural gas processing plants in the U.S. and Canada, as well as expansions and new builds with over 140 Bcf/d of total capacity.

03 Platts NGL Market Monitors

Receive in-depth daily analysis for North American NGL markets, covering industry highlights, prices, spreads and estimated petrochemical margins for ethane, propane, normal butane, isobutane and natural gasoline.

04 Platts NGL Supply Databank

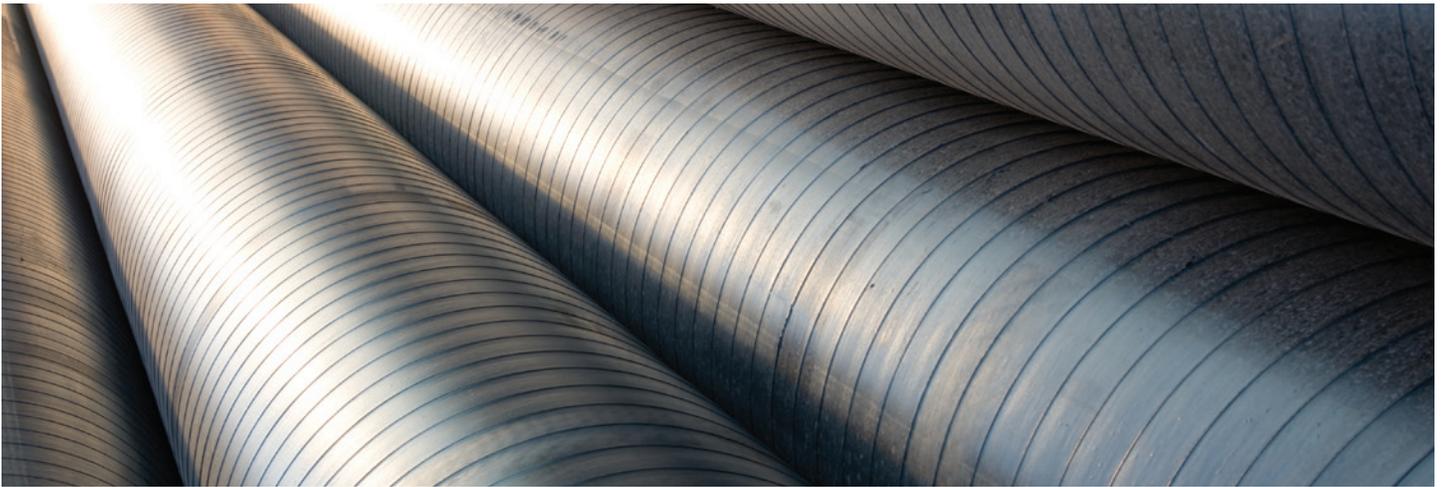

Get access to gas plant data in a standardized format, tracking key operating statistics including natural gas inlet and tailgate volumes, GPM, shrinkage and the production of NGL products.

05 Platts NGL Supply Report

Obtain an up-to-date review of raw mix supply in the marketplace and get daily estimates of PADD-level raw mix and purity product production, PADD-to-PADD raw mix flows, and ethane fractionation spreads.

06 Platts Global Polyolefins Outlook

Receive a global 10-year outlook on ethylene, propylene, polyethylene and polypropylene supply and demand, ethylene and polyethylene price forecasts, utilizing essential market data, intelligence and insight through integrated analysis from upstream to downstream.

Metals

Companies that work with metals are always searching for ways to gain an advantage in the hyper-competitive global markets. Support from robust analytics is crucial in helping to make better decisions for improved product costs and margins, deeper insights as well as a comprehensive understanding of factors that may affect risk management, capital investments, production and operations.

What we offer

Whether you need real-time data or long-term analysis, S&P Global Platts iron and steel industry analytics solutions are designed to directly help you manage your daily business requirements. Get the latest market trends and insights and leverage in-depth import, export and raw material data on the metals markets.

- Understand price drivers and trends that will affect your trading and contract negotiations for ferrous materials
- Stay ahead of your competition with intelligence to help you understand key regional and global market activity in the steel market
- Develop a strong pricing and business strategy by referencing specialist analysis from the most important steel markets in the world

Solution

01 Platts Steel Data and Analysis

Stay informed of the latest changes in the North American steel marketplace, and follow CISA and the Chinese Department of Commerce data to keep up to date on China's steel market.

Key steel market data and statistics include:

- **Global Trade Data:**
 - Import and export data by source and destination country
 - Six-digit HTS code level for all data points
- **North American and Chinese statistical data:**
 - Production and shipments by product
 - Imports and exports
 - Shipments by market classification
 - Over 10 years of historical AISI data providing a complete picture of the US steel industry
- **Platts data:**
 - Platts spot prices
 - Indirect steel trade
 - Apparent and actual demand

Natural Gas

The global natural gas market continues to become more connected. Events in one area can have a major impact on fundamentals on the other side of the globe. A deep understanding of the market and transparency into the relationships that make it tick is critical for understanding trends and future changes that will affect your business.

What we offer

S&P Global Platts natural gas analytics solutions provide insight and a unique, independent perspective that delivers high quality analysis and thought-provoking market commentary. Our insights help to reduce uncertainty and facilitate confident business decisions. Whether your focus is on the North American or European gas markets, we provide the critical market data, forecasts, industry news and analysis to meet your business needs.

Solution

01 Global Coverage

Gain holistic insights via extensive regional coverage of the natural gas markets featuring our largest suite of forecasts, data and analysis.

PIRA European Gas Analytics Service	Covers Europe's well-established natural gas trade by analyzing by-country market fundamentals
PIRA North American Gas Analytics Service	Provides clients with independent and timely analysis of US, Canadian and Mexican gas markets

02 Upstream

Benefit from a deep view into production value chain by region in North America, including forecasts and daily data covering supply and demand as well as analysis on market moving events.

Platts Production Monitor - Canada	Covers British Columbia, Alberta, Bitumen, Saskatchewan, Manitoba, Eastern Provinces, Northern Territories.
Platts Production Monitor - Midcon	Covers Anadarko, Williston, Ardmore, Fayetteville, Arkoma-Woodford, Palo Duro, Ohio, Michigan, PADD 2.
Platts Production Monitor - Northeast	Covers Marcellus – wet and dry, Utica – wet and dry, New York, Kentucky, Virginia, PADD 1.
Platts Production Monitor - Southeast	Covers Permian, Eagle Ford, Ft. Worth, Offshore, LA Gulf Coast, Haynesville, Fayetteville, East Texas, Arkoma-Woodford, Palo Duro, San Juan, PADD 3.
Platts Production Monitor - West	Covers Williston, Denver-Julesburg, Powder River, Uinta, Green River, Piceance, Paradox, San Juan, Raton, California, Alaska, PADDs 4 and 5.

03 Midstream

Understand natural gas markets by region in North America through detailed coverage providing supply and demand analysis along with forecasts, flow data and historical data.

Platts Canada Package	Covers natural gas in the respective markets with detailed information needed to excel in today's dynamic marketplace. Each package includes data and analysis covering natural gas pipeline flows, production data and projections, supply and demand tables and a weekly recap of key gas stories.
Platts Midcontinent Package	
Platts West Package	
Platts Southeast/Gulf Package	
Platts Northeast Package	
Platts Mexico Package	

04 Daily Reports

Stay abreast of the latest developments that can change supply/demand dynamics and prices.

PIRA End-User Gas Price Service	Get reports from official sources in over 115 countries and territories, ranging from 1999 to the present day
Platts Supply and Demand Daily	Provides a daily estimate of key natural gas fundamentals at US national and regional levels

05 Data tools for modeling and in-house analysis

Identify key market information such as natural gas production out of a basin each day or the changes in the amount of gas in storage and more.

Platts Data Warehouse Basic	Analyze daily gas flow data from more than 230 pipelines and storage facilities covering 35,0000 specific points in the United States, Canada and along the Mexican border
Platts Data Warehouse Premium	Access all information in Data Warehouse Basic PLUS modeled forecasts/projections for Flow, Price Cash (ICE), Price Forwards (NYMEX), Weather, No Notice, Gas Quality, Multi Cycle, Cell Cast, Cell Model, Cell Sample, EIA weekly storage, Historical Data, Daily Market Model Data, and EIA monthly storage

06 European coverage

Get straight to the core of UK and Europe's gas market drivers.

Europe Gas Long Term	Receive insights on the key medium to long-term issues affecting the UK and European gas market, including policy developments, future contract structures and scenario-based forecast of gas prices from 2019 to 2040.
UK and Europe Gas Short Term	Understand the latest news and fundamentals that drive developments in UK and Europe gas markets in the short term.

Liquefied Natural Gas

A Global LNG market is growing and evolving rapidly. Insight into the entire LNG value chain is imperative as the market dynamics shift and the power play between buyers and suppliers adds tensions and opportunities. As the market is disrupted and complexities unfold, LNG players require transparency in pricing, market data and insight to remain competitive.

What we offer

S&P Global Platts closely tracks LNG movement and important stories with independent news, analysis and data that provides a comprehensive view of every aspect of the market. From benchmark pricing with the Platts Japan Korea Marker (JKM™) and the Platts Gulf Coast Marker (GCM™), to unique analysis and comprehensive reporting, Platts LNG products will help you get all the information you need to help you stay profitable while working in the LNG markets.

Solution

01 Platts LNG Navigator

Benefit from the most comprehensive LNG offering available on the market, providing global fundamental analysis, data, news and pricing all in one place, covering:

- Live global LNG balance
- Ship tracking of LNG volumes with predicted ETAs and destinations for LNG vessels
- Future supply and demand of LNG on a global level, by country
- Weekly analysis on the Global LNG Market, targeted at short-term dynamics (and monthly)
- Price outlooks and current prices
- Supply, demand, trade, netbacks and arbitrage
- Inter-fuel competition
- Contracts and tenders, projects and outages

02 PIRA Global LNG Analytics Service

Leverage rigorous fundamental analyses of worldwide LNG markets, including a comprehensive outlook for prices, supply, demand, trade, netbacks and arbitrage, and inter-fuel competition. Service covers both the contract flow of LNG and market-responsive spot trade as well as short term and long term (to 2040) dynamics.

Agriculture & Biofuels

With ever-changing government trade policies and the unpredictability of weather, it is hard to know what the agriculture markets will do next. Maximizing your success comes down to the quality of your decisions. S&P Global Platts helps you to see market patterns with clarity and in context, providing ready access to impartial analysis that will help you spot opportunities, negotiate contracts with confidence and stay on top of agriculture market fundamentals.

What we offer

S&P Global Platts analytics solutions for agriculture and biofuels help you understand key trends to make better-informed trading and business decisions.

- Gain greater transparency to interconnected agriculture markets via our longstanding heritage across sugar, grains and biofuels markets
- Leverage historical data to help you see where the market is heading, so you can plan with greater certainty
- Monitor market movements, value commodities, recognize opportunities and plan for the future with greater confidence

Solution

01 PIRA Agricultural Commodities Analytics Service

Stay up to date on global agricultural markets, and production and demand estimates for corn, soybeans, soy products, and wheat; as well as for related commodities such as cattle, hogs, and ethanol.

02 Platts Kingsman Sugar Packages

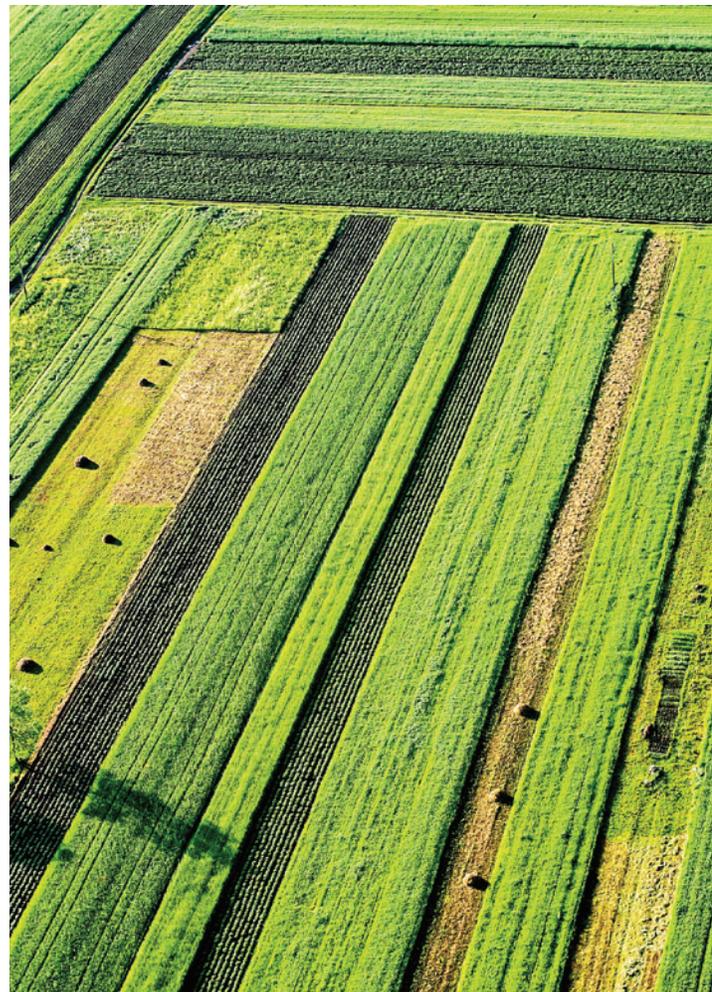

Get a bird's-eye view on global sugar markets. Platts Kingsman Sugar Packages bring transparency to the global sugar markets through a unique mix of fundamentals, news and prices reports, powered by Platts robust methodology and tailored to your specific needs.

03 Platts Kingsman EU Sugar Package

Helping you tackle regulatory changes, Platts Kingsman EU Sugar Package brings the clarity you need to make confident business decisions in the EU sugar market.

04 Platts Biofuels Packages

Platts Biofuels Packages bring transparency to the global biofuels markets through a unique mix of fundamentals, news and prices reports, powered by Platts robust methodology and tailored to your specific needs.

Coal, Emissions & Power

Globally, the electricity sector markets are changing rapidly thanks to the development of wholesale power markets increasing penetration of renewable energy, changes in government policy to address carbon emissions and other

environmental concerns. Power professionals in these fast-moving markets need access to independent analyses and reliable information to help them make faster and better decisions.

What we offer

Our range of coal, power and emissions analytics solutions provide you with clarity in these highly complex and dynamic marketplaces:

- Gain market insight from in-depth analysis of long-term policy and technology trends, including coverage of renewable energy and storage
- Get an overview of upcoming regulatory changes at the Federal, State, and Local levels in North America
- See a holistic pan-European power product suite with coverage from the short term out to 2040, making use of S&P Global Platts' expertise across fuel and carbon markets
- Access market leading price forecasts for key European power markets built on an unparalleled view of fundamental inputs and utilizing S&P Global Platts' proprietary fuel price forecasts
- Understand market developments from a team of experts with one eye on future implications for your business
- Utilize comprehensive data and analysis from the North American and European electricity markets to provide more detailed views into power generation

Solution

01 PIRA North American Electricity Daily Demand Forecast

Predict North American regional loads in the Eastern and Western Interconnects, ERCOT, and Quebec, incorporating NOAA model output statistics and weather forecasts from more than 200 weather stations in the United States and Canada.

02 PIRA European Electricity Analytics Service

Gain market insights into the developments of power generation, demand, cross-border trading, and prices for Europe's most relevant markets for electricity trade, with a focus on Continental Europe, Nordics and Eastern Europe.

03 PIRA North American Electricity Analytics Service

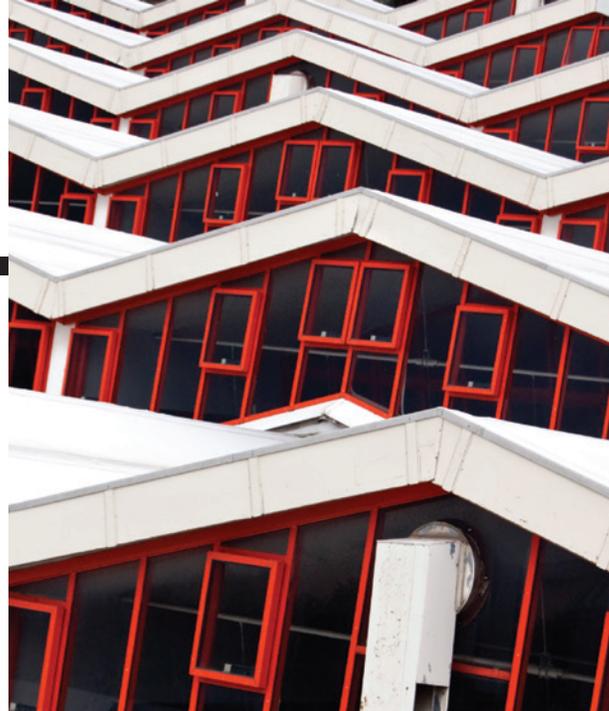

Comprehensive and granular coverage of the North American and European electric power markets provides the critical forecasts, benchmarking metrics, and up-to-date data necessary to make informed decisions.

04 PIRA International Coal Analytics Service

Leverage comprehensive coverage of the seaborne and U.S. coal markets with a deep understanding about the largest source of power generation and second-largest source of primary energy in the world.

05 PIRA European Renewable Energy Forecasting Service

Access forecasts for wind and solar generation in main European markets, derived from a sophisticated statistical model that tracks renewable energy output, installed capacities, and several key weather factors sourced from leading weather authorities.

07 PIRA Greenhouse Gas Emissions Analytics Service

Get an in-depth understanding of the underlying emissions fundamentals for traded carbon markets including detailed coverage of carbon markets, including EUETS, RGGI and CA/WCI as well as analysis of fuel choices, fuel competitiveness, technology, economic growth and policymaking drivers that affect demand and supply.

08 North American Environmental Markets Analytics Service

Understand the forces that affect the U.S. acid rain, fine particulate and ozone-related emissions markets (i.e. CSAPR or CAIR for NOx and SO2); markets for greenhouse gases (such as RGGI and CA/WCI); as well as emerging controls for mercury, heavy metals, acid gases, and other waste discharges into the air, water or land.

Scenario Planning Services

Given the significant investments and long-term commitments that organizations have to make in the oil, gas and coal markets, it's essential for decision makers to develop, consider and apply scenarios as part of an ongoing process for the exploration of possibilities, uncertainties, and boundaries of the future.

What we offer

PIRA Scenario Planning Service is designed to set you up for success over the long-term. We define and track the critical assumptions behind our worldwide oil, gas and coal projections with a focus on our medium-term (one to two years) and longer-term (2040) outlooks that are most relevant to your business.

Solution

01 Annual Scenario Guidebook

PIRA Annual Scenario Guidebook covers detailed long-term energy forecasts and key assumptions behind them to assist you in your strategic planning and modeling requirements.

02 Quarterly Scenario Tracking Reports

Get quarterly updates based on PIRA reference case, lower-price, and higher-price scenarios for the near term for global oil, North American natural gas and global gas. These reports represent our most current view of the long-term scenarios defined in the latest Annual Scenario Guidebook based on the impact on our tracking indicators of current events, announcements and data.

03 Current News and Analysis bulletins

Stay up to date on the latest energy market developments relating to PIRA Scenario Planning Service, with a focus on developments that impact the medium-term outlook.

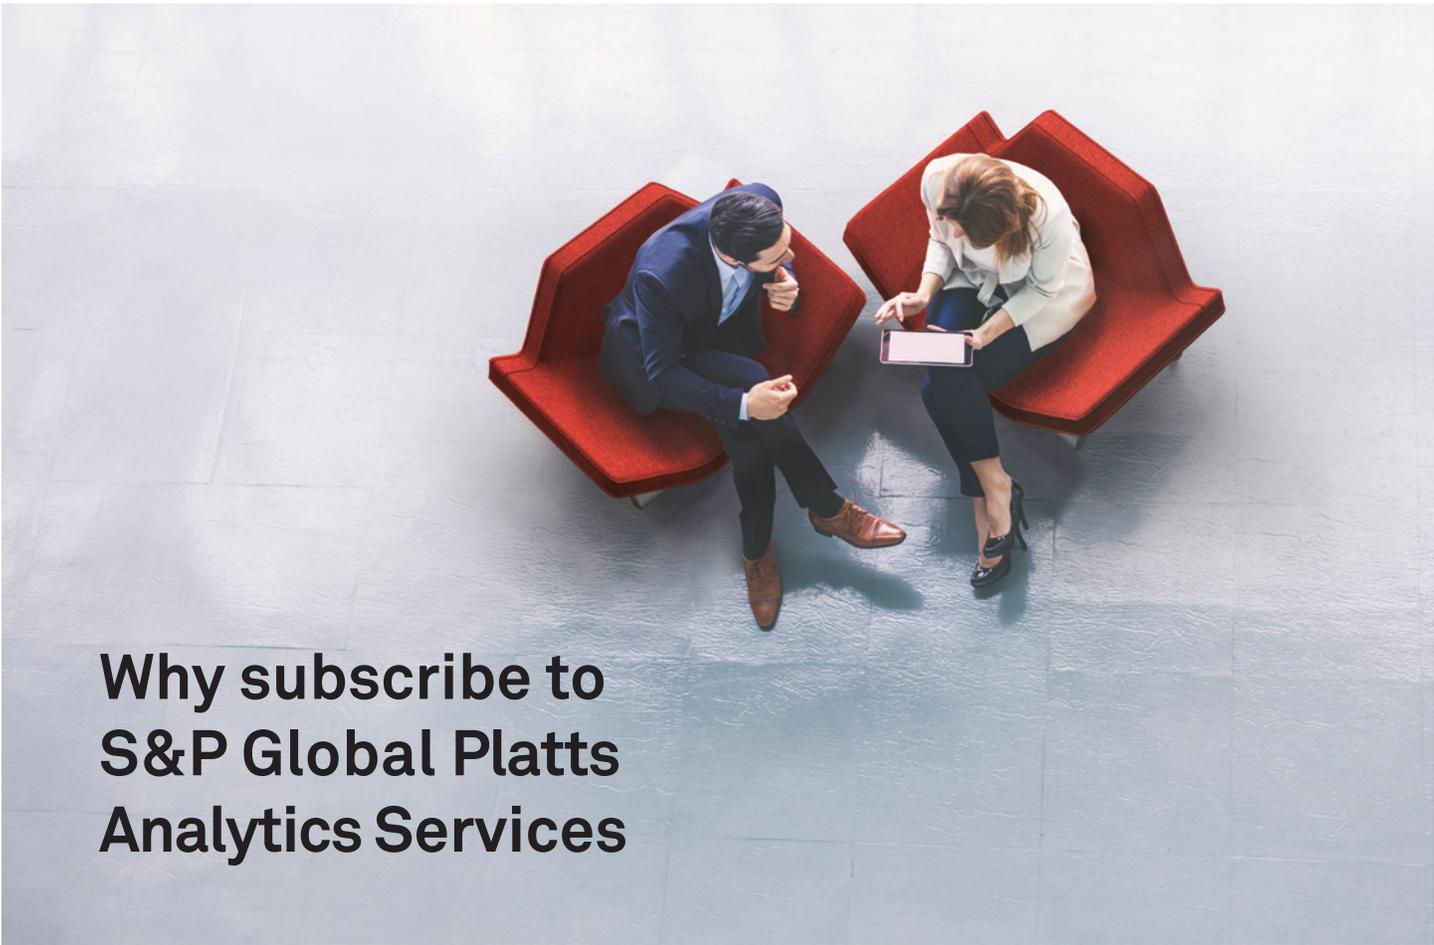

04 Annual Roundtable Meetings

Gain insights on energy market scenarios through face-to-face roundtable events directly with the S&P Global Platts' Scenario Planning team, hold dialogue over specific key concerns, and define additional scenarios of interest.

05 Fracking Policy Monitor

Get access to a quarterly report covering developments in government policies, litigation and public opinion on hydraulic fracturing (fracking) in the U.S. and around the world.

Why subscribe to S&P Global Platts Analytics Services

Benefits of S&P Global Platts Analytics Services

When markets can change daily, having the right insights at the right time can make all the difference.

That's why business leaders, operational teams, traders, analysts, risk managers, purchasing agents and other professionals involved in the energy and commodity markets at more than 12,000+ public and private sector organizations in over 190 countries have benefited by subscribing to S&P Global Platts solutions on an ongoing basis.

Whether you're in an exploration company, refinery, utility, airline, steel company, auto manufacturer, financial institution or government agency, an analytics subscription can help you:

-
- Stay abreast of market developments that matter most to your business
 - Write contracts based on timely and accurate insights
 - Forecast supply, demand and price changes with confidence
 - Keep tabs on your competitors' latest initiatives
 - Evaluate new opportunities as they emerge
 - Reduce risks and avoid costly mistakes
