CEO's Phone Number:	_____

Award of Excellence – Power

This award is open to power producers (coal, gas, nuclear, oil, hydroelectric, solar, wind, other renewable generating fuels and fully integrated power producers), utilities, system operators and regional market entities.

Rapid changes in technology, coupled with uncertain environmental, regulatory and severe economic conditions, present vast and complex requirements for the broad range of companies operating in the power space.

Winners will demonstrate successful strategic planning for top performance and growth, while embracing a radically new business and trading environment. Entries should convey reliable and robust system operations, early and consistent development of customer-centric technologies and protocols, creation and maintenance of diverse and comprehensive supply portfolios and evident foresight in preparing for grid modernization and cybersecurity.

Entries may include setting and achieving ambitious carbon targets, navigating financial and political complexities, and fortifying plans for continued threats of cyber and physical attacks on the power grid.

Judges will focus on evidence of industry-wide impact since January 2019, in addition to considering the three-year track record of an entrant.

The [judging criteria glossary](#) provides suggested content for the criteria below.
