Award of Excellence – Upstream Transformation

This award is open to integrated energy companies, on and offshore drilling services, upstream oil and gas organizations and specialist exploration companies.

Over the past year, relatively low prices have forced a decrease in production. This backdrop affords an opportunity for savvy market participants who can ride the choppy waves to stronger market fundamentals.

Judges seek companies that are firmly weathering the downturn, for instance creating innovative financial solutions, establishing world-class standards in E&P, reaching new levels of technical excellence and bringing complex and/or difficult projects to completion.

In addition to optimized operational practices, the winner will have clearly demonstrated its commitment to emissions reductions, safer extraction techniques and investments in technology, while providing economic benefits to its communities.

Judges will focus on evidence of industry-wide impact since January 2019, in addition to considering the three-year track record of an entrant.
