CEO's City/Town _____

CEO's State: _____

CEO's ZIP/Postal Code: _____

CEO's Country: * _____

CEO's Email Address: _____

CEO's Phone Number: _____

Emerging Technology of the Year

This award is open to organizations who are developing a specific technology or solution that is not yet commercially available.

***Solutions that are generating revenue or commercially available should apply under Commercial Technology.*

As the world struggles to adapt to these ever-changing times and quickly readjust traditional methods of operation, the race to bring new and innovative technologies to maturity and mass-market penetration is fierce. First movers deserve proper recognition.

This award will focus on the research and development, ingenuity and commercialization potential of new technologies, before their state of deployment. Examples might include technologies focused on renewable energy, energy storage, blockchain application, transforming waste into revenue streams, advanced propulsion systems or electric/hybrid transport.

Judges will consider any technology launched or patented since January 2019; and not yet in full-scale, commercial operation. Technologies operating in test facilities or initial phases will be considered, provided they have been technologically proven.

Samples of photos, videos or other imagery are encouraged but not required.

The [judging criteria glossary](#) provides suggested content for the criteria below.

S&P GLOBAL PLATTS GLOBAL ENERGY AWARDS

1. Company Profile: * (300 word limit)

2. Summary and Rationale: * (300 word limit)

3-4 highlights that communicate why your entry should win
