## Engineering Solution of the Year

*Open to energy organizations, engineering firms and other entities that have successfully implemented a singular engineering solution since January 2019.*

*Designed specifically to reward engineering excellence, this award is distinct from the Construction Project award; and traditionally, not given to a construction project as a whole.*

*The aim of this category is to highlight achievements in surmounting a specific engineering challenge, whether in complex and difficult environments, in executing a precision task, or in solving a specific engineering obstacle in new ways. In choosing a winner, Judges will consider environmental factors as well as the technical breadth of project activity.*

*Nominations should highlight an engineering solution as part of a completed project and demonstrate its impact and effectiveness, the innovative aspects of the engineering involved, and the difficulties overcome in implementation.*

*Judges will consider projects completed between January 2019 and September 2020.*

*Samples of photos, videos or other imagery are encouraged but not required.*
