CEO's Phone Number: _____

Grid Edge Award

This award is open to startups, technology applications (e.g. blockchain, applied AI, machine learning), utilities, energy service providers, system operators, renewable energy generators and distributors, battery applications and energy storage, electric vehicles and other automotive integrations.

This category aims to recognize innovators throughout the entire energy system who are advancing the electric grid to most effectively link utilities to customers. Converting grid disruptors to grid enablers requires revolution in myriad forms, from power producers to novel regulatory structures and policy framework, all the way to the ultimate consumer interface.

Entries should show quantified results that convey how the innovation is progressing toward an improved future energy system. The nomination should articulate how its distinct application solves for specific inefficiencies or complications across the energy system and electric grid.

Judges want to see cutting-edge, commercial implementations that truly advance the concept into new territory. Their focus will be exclusively on achievements since January 2019.

The [judging criteria glossary](#) provides suggested content for the criteria below.

S&P GLOBAL PLATTS GLOBAL ENERGY AWARDS

1. Company Profile: * (300 word limit)

2. Summary and Rationale: * (300 word limit)

3-4 highlights that communicate why your entry should win
