

S&P GLOBAL PLATTS GLOBAL ENERGY AWARDS

Engineering Project of the Year Award Nomination Form

Engineering Project of the Year

Open to energy organizations, engineering firms and other entities that have successfully implemented an engineering solution since January 2018.

Designed specifically to reward engineering excellence, this award is distinct from the Construction Award and will not normally be given to a construction project. Rather, it aims to highlight achievements in surmounting specific engineering challenges, whether in complex and difficult environments, in executing a precision task, or in solving specific engineering problems in new ways. In choosing a winner, Judges will consider environmental factors as well as the technical breadth of project activity.

Nominations should highlight a key project and demonstrate its impact and effectiveness, the innovative aspects of the engineering involved and the difficulties overcome in implementation.

Judges will consider projects completed between January 2018 and September 2019.
